#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-31 and 46-79, in the reply filed on October 1, 2009 is acknowledged. Applicant argues that Groups I and II should be examined together, since the features being claimed in Group II are also claimed in Group I (see page 1, second to last paragraph).

Upon further consideration, the previous requirement for restriction is withdrawn.

However, a new requirement for restriction is made as follows:

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I, claims 1-46, 57-67 and 71-85:**

Drawn to apparatuses for conveying particulate materials.

**Group II, claims 47-56 and 68-70:**

Drawn to processes for conveying particulate materials.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature shared by Groups I and II is the loading of particulate material into

a unit with the aid of vacuum, and the discharging of particulate material from the unit with the aid of pressure. Groups I and II lack unity of invention because even though the inventions of these groups require the same technical feature, this technical feature is not a “special technical feature”, as it does not make a contribution over the prior art cited in the International Search Report to Levine et al. (US 4,695,205), Bartholic (WO 89/07487), Harpham (WO 00/48723) and Evans (US 6,358,401). In addition, the technical feature does not make a contribution over the prior art to Freeman (US 4,005,908).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
